

Summary

As a B.E student specialising in Computer Science and Engineering at Annai Mira Engineering College, I am building a strong foundation in software development and data structures. I am actively seeking opportunities to apply my academic knowledge and develop practical skills in the tech industry. My focus is on leveraging my analytical abilities and problem-solving skills to contribute to innovative projects and gain hands-on experience.

Education

B.Tech/BE (Bachelor of Technology/Bachelor of Engineering)

📍 Annai Mira College of Engineering and Technology (AMCET), Ratnagiri
Kilminnal, Tamil Nadu

📅 2024- 2027 • Graduation • Computer Science And Engineering

Projects

AI-Integrated E-Commerce Platform (Group Project)

🔗 [Project Link](#)

- **Backend & AI Lead:** Architected a robust microservices system using Spring Boot (Java) and FastAPI (Python), collaborating with a Frontend Developer (React.js) to deliver a seamless user experience.
- **Service Integration:** Engineered RESTful APIs to connect core business logic with an AI engine, enabling real-time product recommendations and automated content generation.
- **Automated Cataloging:** Developed an AI pipeline in Python that automatically generates optimized product tags and descriptions, significantly reducing administrative overhead.
- **Visual Search Implementation:** Built and deployed a visual search service, allowing the React frontend to process image-based queries via a Python-based machine learning backend.

Skills

- Problem Solving
- Data Structures and Algorithms
- Software Development Life Cycle (SDLC)
- Spring Boot
- java, object-oriented programming (oop)
